Winter Health – Beating the Bugs

In Australia, our influenza 'flu' season typically runs from May to October, usually peaking in August.

It is just not possible to stop all bugs from spreading at school, however, a lot of illnesses can be prevented and controlled simply by practicing good hygiene.

Handy hygiene tips for you and your family

- Cover your mouth and nose with a tissue when coughing or sneezing
- Throw used tissues in plastic-lined rubbish bins
- Wash your hands with soap and water, preferably warm water if available
- Reduce the spread of germs by avoiding touching your eyes, nose and mouth

Further information on influenza is available at the Better Health Channel - www.betterhealth.vic.gov.au

What can you do to prevent the spread of infectious diseases?

The three main ways of preventing the spread of infection are:

1. Remind your child of effective hygiene methods.
2. **Keep your child home when they are unwell.** Your doctor will let you know if your child has an 'excludable' condition. You will need to advise the school as soon as possible and keep your child home for the length of time that your doctor advises.
3. Ensure your child's immunisations are up to date.

Dunolly Preschool
